support@mysemhoe.com

Mysemhoe crafts premium artisan tools with 'Cultivate Quality, Creativity & Craftsman' partnering with master craftsmen to uphold tradition. Join us in shaping the future of handcrafted excellence.

In this guide, we'll detail the Mysemhoe Deck Straightening Tool components as well as instructions for using them to both easily and efficiently achieve straighter-than-straight boards!

Straightening Handle
Adjusts pallet wheels

Pallet wheel
Applies or releases
pressure on boards

Joist fastening knob
Adjusts joist lock tightness

Spring Sleeve Assemblies
Stabilizes locking block

Joist stop wheel
Limits joist positioning

Joist lock block
Secures tool to joist

Suitable for sheets thicker than 0.51 inches.

Installation Instructions

1

Lay out the boards to be installed and secure the first board in place.

2

Turn the joist fastening knob to release the lock block; pull down the lock block to increase the clamping space.

3

Rotate the straightening handle to tighten it and ensure a firm grip.

4

Push the straightening handle toward the board to apply pressure. Adjust the planks until the desired gap spacing is achieved.

5

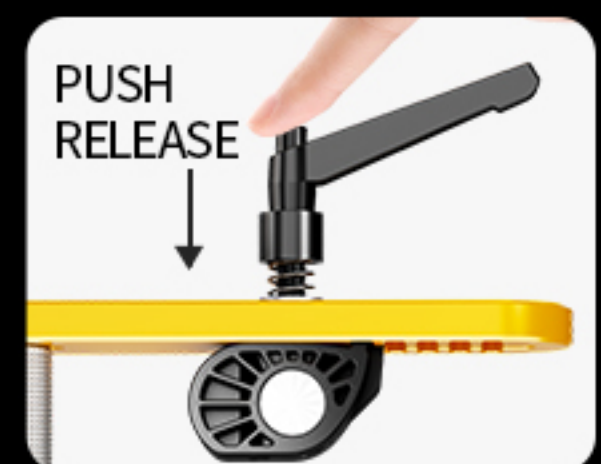

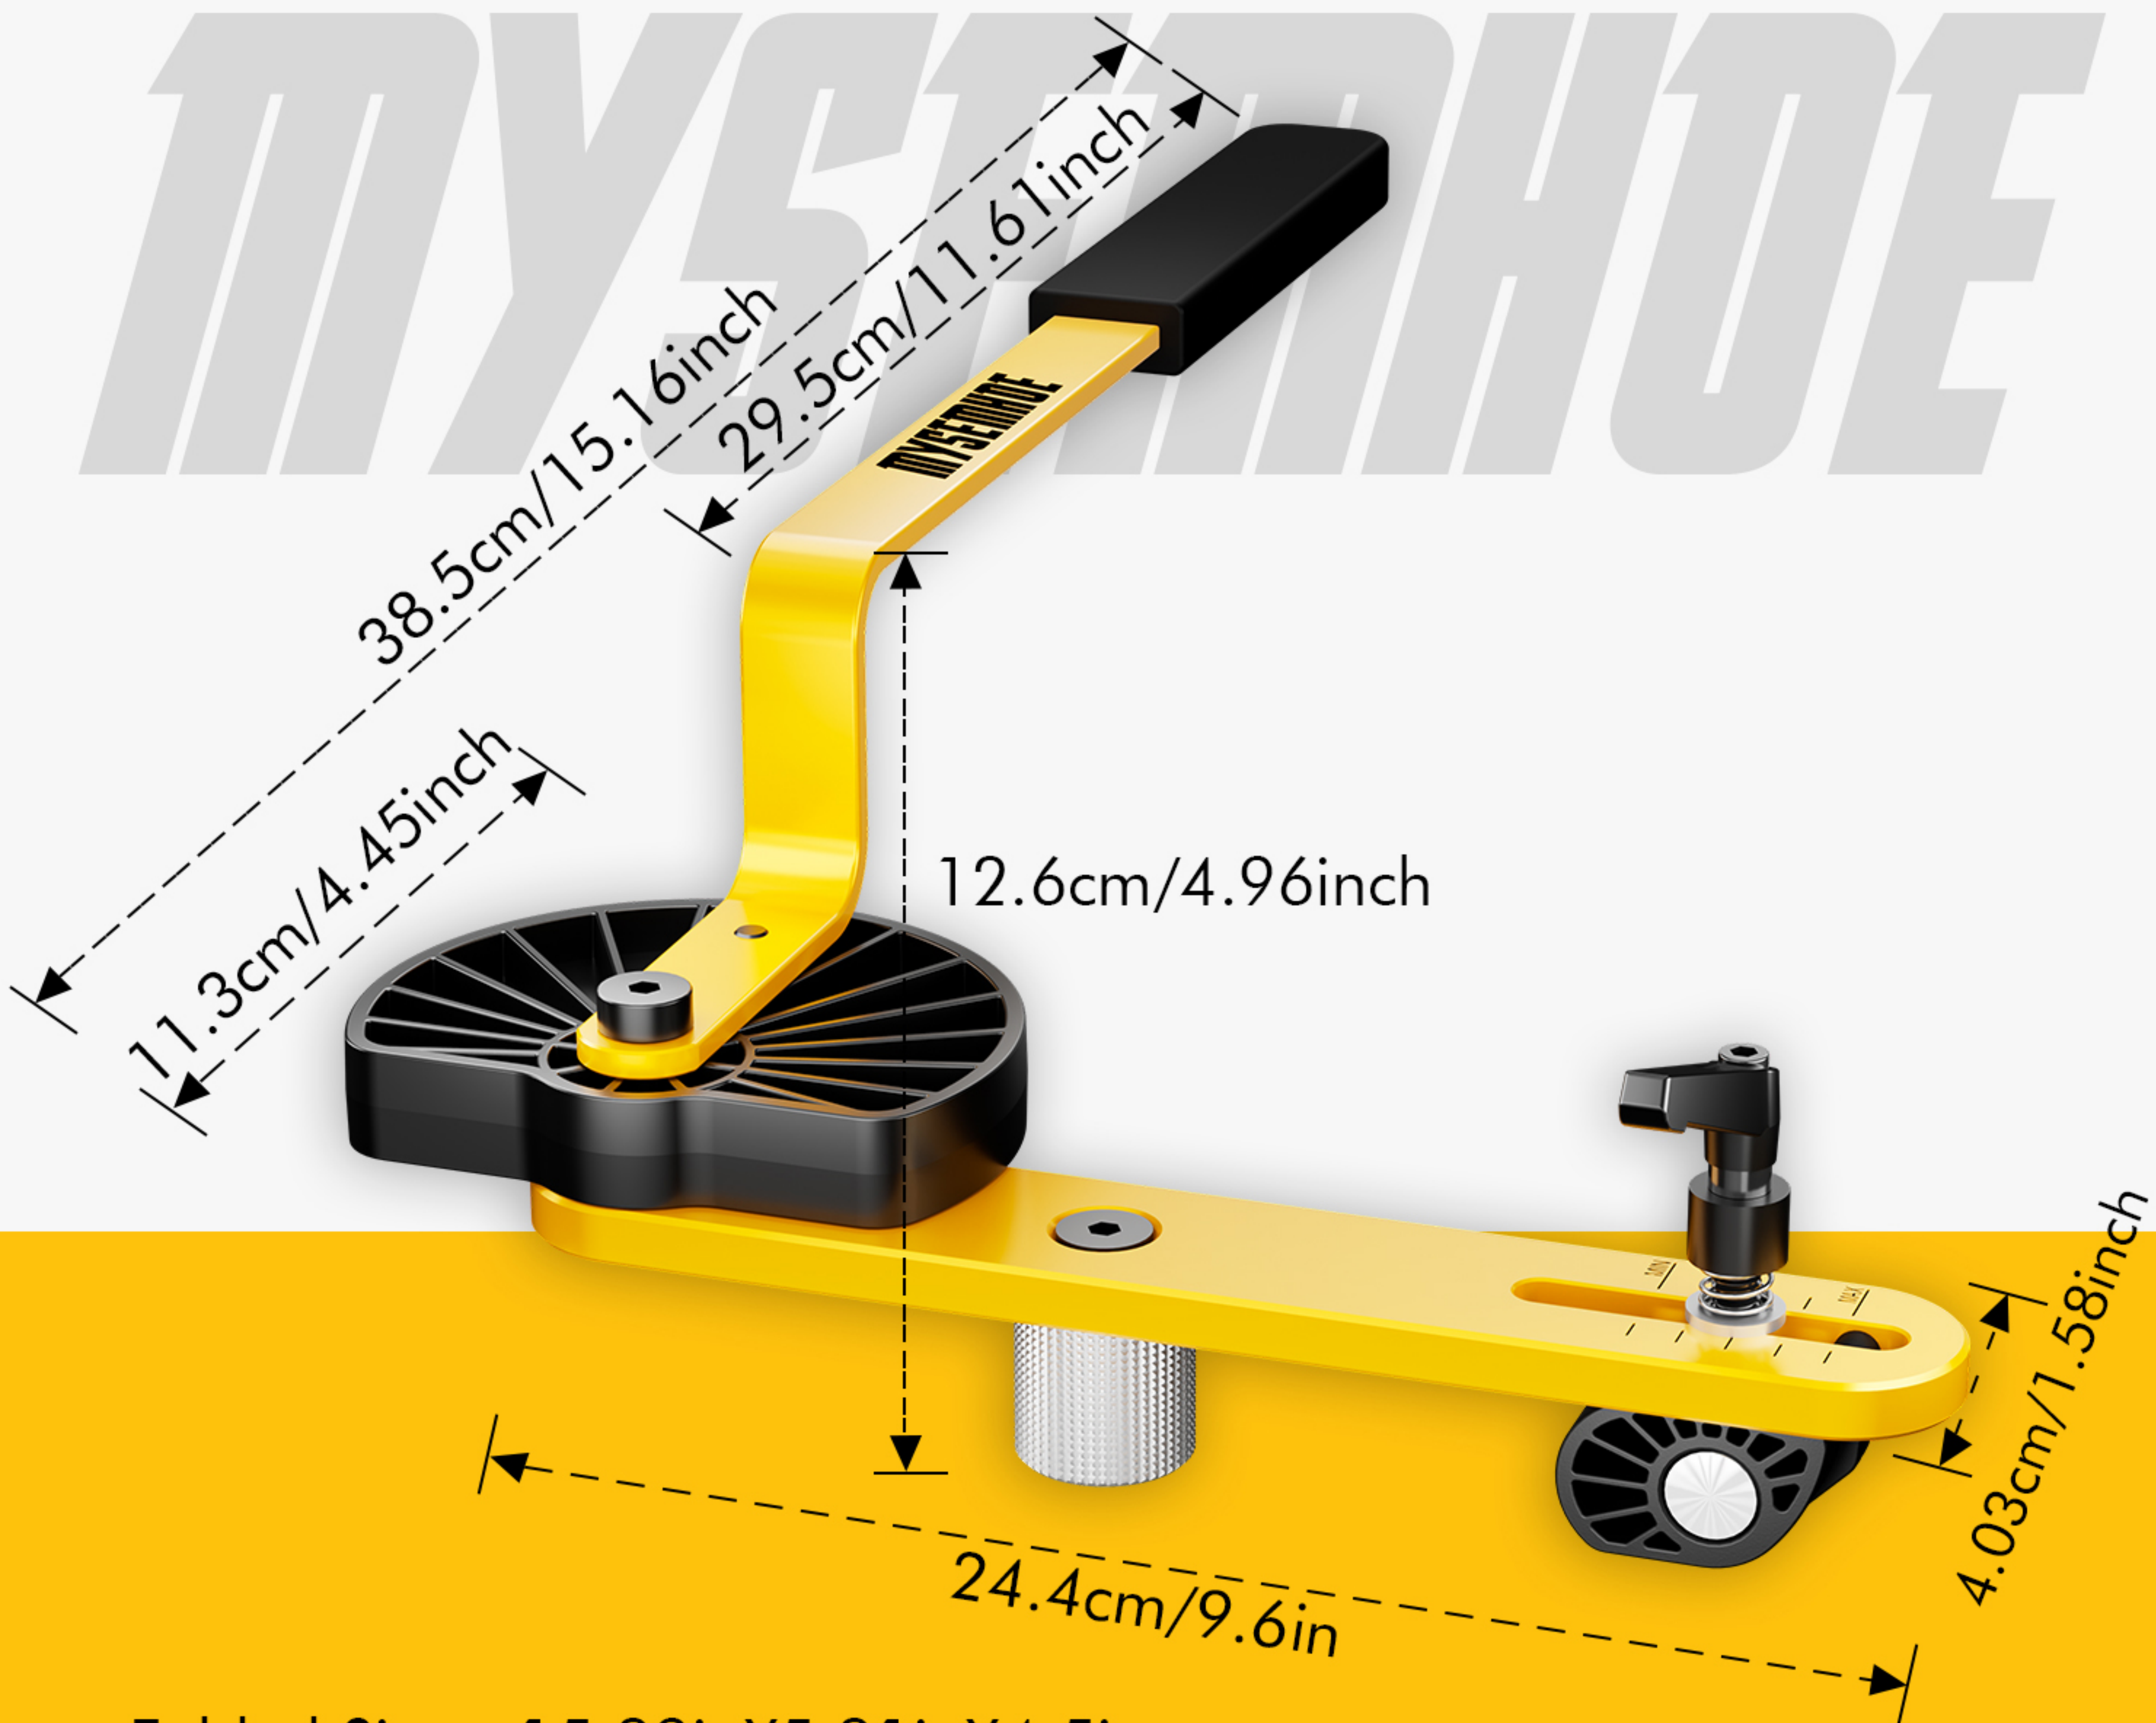

When proper alignment is achieved, cease adjustment and secure with floor screws.

6

1. After installation, turn the straightening handle to release the pressure.
2. Turn the knob to loosen the locking block, then remove the tool.

Folded Size: 15.39inX5.31inX4.5in

Unfolded size: 23.42inX5.31inX4.5in

Weights: 3.3LBS

Cross-type adaptation,
efficient completion of construction tasks

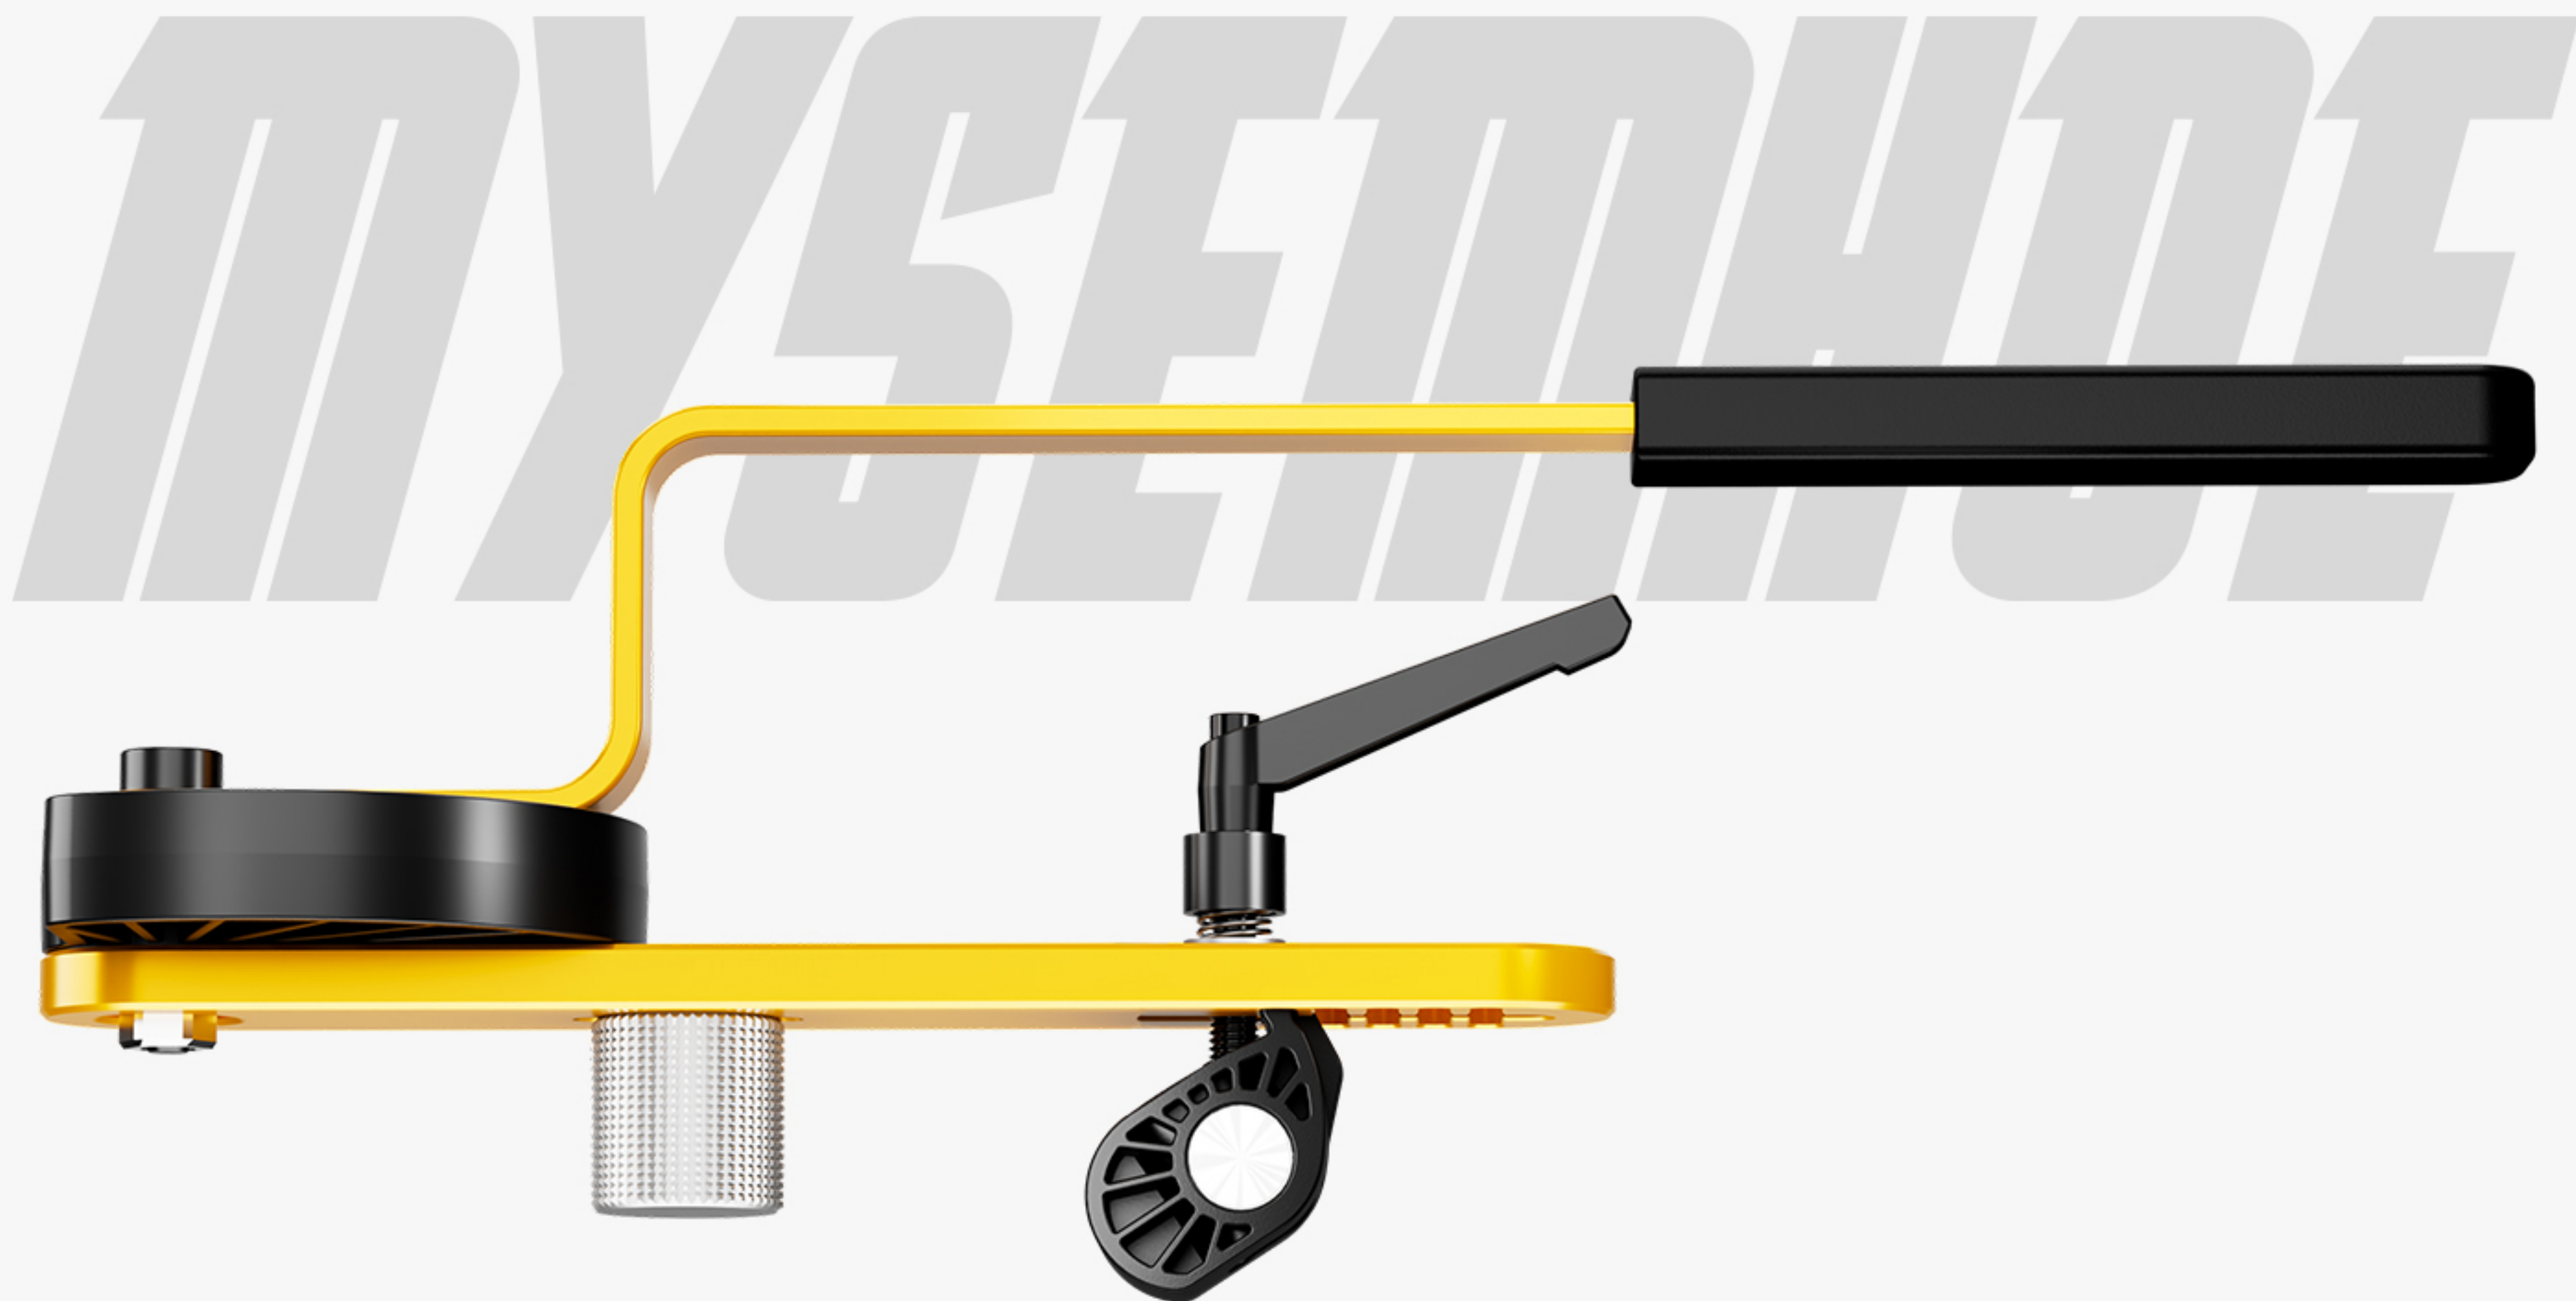

Single joist

Double joist

Metal joist

WARNING

Instructions must be read before use
